👤 PROFILE

Results-driven Data Science Architect with ~7 years of experience transforming marketing and customer engagement through AI. Expert in applied GenAI, recommendation systems, and predictive modelling, with a proven ability to deliver measurable ROI for *Fortune 500 clients*, while leading technical strategy. Currently a Data Science Architect at CleverTap.

📁 PROFESSIONAL EXPERIENCE

Architect – Data Science, CleverTap

06/2020 – Present

Mumbai, India

- **Architected and scaled AI personalization systems** for recommendations and predictions, used by top global brands (e.g., Jio, SonyLiv, Zee5, TataCliq, Puma), driving up to **210% lift in conversions** and enabling **95%+ marketing cost reduction**.
- Designed and launched enterprise-grade **LLM-powered agents** for customer support and analytics, including agentic RAG, Prompt-to-Analytics, and Prompt-to-Journey, reducing response time from **48 hours to 10 seconds** across **~2,500 daily queries**.
- Built **high-scale, low-latency hybrid recommendation engines** combining language model embeddings and behavioral signals for millions of items; designed training data pipelines, modeling workflows, and production serving + monitoring with **Postgres + vector databases** at **sub-50 ms latency**.
- Led development of Scribe, a contextual **generative AI agent** for marketing copy generation, cutting creation time from hours to **under 5 seconds**.
- Worked on a **1:1 campaign ranker** using reinforcement learning techniques to enable truly individualized and smart marketing selection
- Served as Data Science Architect across AI initiatives, **driving technical strategy**, infrastructure decisions, code reviews, team management, and **cross-functional execution** across almost all AI initiatives: LLMs, anomaly detection, MLOps, personalization, analytics, etc.
- **Thought leadership:** delivered talks on LLMs, vector databases, wrote blogs on various AI topics, and represented Data Science in dozens of customer-facing meetings with CTOs/leadership teams to shape product adoption.
- Recognized with multiple awards, promotions, and hackathon wins for consistent impact.

Data Science Intern, CleverTap

12/2019 – 06/2020

Mumbai, India

- As part of the Data Science team I worked on an implementation of Explainable AI (XAI) to explain the traditionally black-box ML models used by CleverTap for Customer Segmentation to their clients visually using R and Python.
- Created an automated script to make simple to understand rules from XGBoost models to help CleverTap clients make effective impact on their users through suitable campaigns.

Data Analyst, WisOpt

02/2018 – 07/2019

Chennai, India

- Key person for data analytics, python backend, machine learning, database administration (MongoDB, MySQL). Increasing the productivity of more than 9,000 students and teachers.
- Deployed a recommendation system used by 1000s of students daily. Worked on chatbots, NLP, dashboards, APIs, etc.

Data Science Intern, Oracle

11/2018 – 01/2019

Bangalore, India

- Worked with Oracle Financial Services Software, under the Oracle Banking Platform product R&D Team.
- Used Data Analysis and Machine Learning to predict the interest rates to be offered to a customer so as to decrease chances of loan defaults.
- Deployed this as a full-fledged web application using Flask and Swagger frameworks, reading user state and annual income from their salary slip and driver license using OCR.

Software Development Intern, CRMNext

06/2018 – 07/2018

Mumbai, India

- Single handedly developed a windows application for tracking applicants using C# and Visual Studio for use by their Human Resources department, from inception to deployment. The application had an SQL backend.

SKILLS

Generative AI (LLMs, Langchain, Langgraph, AI Agents, Chatbots, RAG, Pinecone, MCP, Vector Databases)

Python

FastAPI

Machine Learning

MLOps (Docker, MLFlow, AWS)

EDUCATION

Bachelor of Technology – BTech in Computer Science,

2016 – 2020

SRM University Chennai

88%

Science + Computer Science, RN Podar School

2014 – 2016

MOOCs (Online Certifications)

- IBM Applied Data Science Capstone (Coursera)
- Python Mega Course, Machine Learning A-Z (Udemy)
- Neural Networks and Deep Learning (Coursera)
- Improving Deep Neural Networks (Coursera)
- Great People Manager Certification (Great Manager Insitute)
- Deep Agents with Langgraph (Langchain)
